

## Domains and Reports

TOTAL POINTS 10

1. What information can you find on the Highlights report page? **Select all that apply.**

1 point

- ☒ Users not enrolled in 2 step verification
- ☒ Users allowed access to less secure apps
- ☒ Changes made to group memberships
- ☒ External apps installed

2. Your IT manager would like to know the total admins in your organization, which report can you generate to find this information?

1 point

- ☐ Security reports
- ☐ Highlights report
- ☒ Account activity reports
- ☐ Aggregate reports

3. After rolling out security keys as part of your organization's 2-step verification initiative, your IT manager would like to know which users have enrolled their security keys. Which report can you generate to find this information?

1 point

- ☐ Account activity reports
- ☐ Security reports
- ☐ Highlights report
- ☒ Aggregate reports

4. Your IT manager would like to know which users are using third-party web applications in your domain, which audit can you generate to find this information?

1 point

- ☐ Admin audit log
- ☐ Groups audit log
- ☒ OAuth Token audit log
- ☐ SAML audit log

5. Which audit log shows a history of every task performed in your Google Admin console and who performed the task?

1 point

- ☐ Admin audit log
- ☒ OAuth Token audit log
- ☐ SAML audit log
- ☐ Groups audit log

6. What data can you track using the Login audit log? **Select all that apply.**

1 point

- ☒ Each time a user has an invalid service provider ID
- ☒ Each time a user fails to log in

- ☒ Each time a user logged out
- ☒ Each time a user logged in and there were some unusual characteristics

7. Once you opened a report or audit log, what additional actions can you take? **Select all that apply.**

1 point

- ☒ You can customize the report or audit log by filtering the data by user or activity.
- ☒ You can download and export your report or audit log data to a CSV file.
- ☒ You can change the data you see in the report or audit log by clicking on the down arrow next to the title above the chart.
- ☒ You can change the data you see in the report or audit log by clicking on the Select Columns button to change the view of the available columns.

8. How do you turn on or off administrator email alerts?

1 point

- ☐ Reports > Manage alerts > click on settings
- ☒ Reports > Manage alerts > toggle switch on or off in the Status column
- ☐ Reports > Manage alerts > click on the predefined alert to edit
- ☐ Reports > Admin > Filters > Set Alert

9. What type of email administrator email alerts can you receive? **Select all that apply.**

1 point

- ☒ Your own custom alerts based on your organization audit logs like Admin, Login or Tokens for example.
- ☒ 2-Step Verification and when a user enrolls in 2 Step-Verification or a security key.
- ☒ Mobile device activity alerts like device compromise update or suspicious mobile activity for example.
- ☒ User activity alerts like when a user is added or deleted, granted Admin privileges or suspended for example.

10. Your organization recently purchased some new domains and would like to add them to your Cloud Identity account. Your IT manager isn't sure whether to add your domain as a domain alias or as an additional domain and has asked you to clarify the difference between each. How would you describe the difference between each?

1 point

- ☐ When you add the domain as a domain alias, each user will have an email address at both your primary domain and domain alias and you'll have to pay for each user account added in the additional domain. When you add the domain as an additional domain, each user will have a new Cloud Identity account created for them at the new domain and you'll have to pay for each user account added in the additional domain.
- ☒ When you add the domain as a domain alias, each user will have an email address at both your primary domain and domain alias and there is no additional cost per user or group. When you add the domain as an additional domain, each user will have a new Cloud Identity account created for them at the new domain and you'll have to pay for each user account added in the additional domain.
- ☐ When you add the domain as a domain alias, each user will have an email address at both your primary domain and domain alias and there is no additional cost per user or group. When you add the domain as an additional domain, each user will have a new Cloud Identity account created for them at the new domain and there is no additional cost per user or group.
- ☐ When you add the domain as a domain alias, each user will have a new Cloud Identity account created for them and you'll have to pay for each user account added in the additional domain. When you add the domain as an additional domain, each user will have a new Cloud Identity account created for them at the new domain and there is no additional cost per user or group.
