Getting Started with Google Cloud Platform

LATEST SUBMISSION GRADE

100%

1. *True or False:* In Google Cloud IAM: if a policy applied at the project level gives you Owner permissions, your access to an individual resource in that project might be restricted to View permission if someone applies a more restrictive policy directly to that resource.

1 / 1 point

☐ True

☒ False

Correct

Correct! Policies are a union of those applied on resource itself and those inherited from higher levels in the hierarchy. If a parent policy is **less** restrictive, it overrides a more restrictive policy applied on the resource. If a parent policy is **more** restrictive, it does not override a less restrictive policy applied on the resource. Therefore, access granted at a higher level in the hierarchy cannot be taken away by policies applied at a lower level in the hierarchy.

2. *True or False:* All Google Cloud Platform resources are associated with a project.

1 / 1 point

☒ True

☐ False

Correct

Correct! All Google Cloud Platform resources are associated with a project.

3. Service accounts are used to provide which of the following? (Choose all that are correct. Choose 3 responses.)

1 / 1 point

A set of predefined permissions

A way to allow users to act with service account permissions

Correct

Correct!

A way to restrict the actions a resource (such as a VM) can perform

Correct

Correct!

Authentication between Google Cloud Platform services

Correct

Correct!

4. How do GCP customers and Google Cloud Platform divide responsibility for security?

1 / 1 point

Google takes care of the higher parts of the stack, and customers are responsible for the lower parts.

All aspects of security are Google's responsibility.

- ☐ All aspects of security are Google's responsibility.
- ☐ All aspects of security are the customer's responsibility.
- ☒ Google takes care of the lower parts of the stack, and customers are responsible for the higher parts.

Correct

Correct!

5. Which of these values is globally unique, permanent, and unchangeable, but chosen by the customer? 1 / 1 point

- ☒ The project ID
- ☐ The project's billing credit-card number
- ☐ The project name
- ☐ The project number

Correct

Correct!

6. Consider a single hierarchy of GCP resources. Which of these situations is possible? (Choose all that are correct. Choose 3 responses.) 1 / 1 point

- ☒ There is no organization node, and there are no folders.

Correct

Correct!

- ☐ There are two or more organization nodes
- ☒ There is an organization node, and there are no folders.

Correct

Correct!

- ☒ There is an organization node, and there is at least one folder.

Correct

Correct!

- ☐ There is no organization node, but there is at least one folder.

7. What is the difference between IAM primitive roles and IAM predefined roles?

1 / 1 point

- ☐ Primitive roles are changeable once assigned. Predefined roles can never be changed.
- ☐ Primitive roles only allow viewing, creating, and deleting resources. Predefined roles allow any modification.
- ☐ Primitive roles only apply to the owner of the GCP project. Predefined roles can be associated with any user.
- ☒ Primitive roles affect all resources in a GCP project. Predefined roles apply to a particular service in a project.
- ☐ Primitive roles can only be granted to single users. Predefined roles can be associated with a group.

Correct

Correct!

8. Which statement is true about billing for solutions deployed using Cloud Marketplace (formerly known as Cloud Launcher)?

1 / 1 point

- ☒ You pay only for the underlying GCP resources you use, with the possible addition of extra fees for commercially licensed software.
- ☐ You pay only for the underlying GCP resources you use; Google pays the

- ☒ You pay only for the underlying GCP resources you use, Google pays the license fees for commercially licensed software.
- ☐ Cloud Marketplace solutions are always free.
- ☐ After a trial period, each Cloud Marketplace solution assesses a fixed recurring monthly fee.

Correct

Correct!
