1. What are some best practices for reinforcing and monitoring the security of your Cloud Identity domain? **Select all that apply.**

1 / 1 point

☒ View user account activity reports

**Correct**

Correct!

☐ Ensure your domain is setup correctly

☒ View and manage your users' security settings

**Correct**

Correct!

☒ Set up 2-step verification

**Correct**

Correct!

2. The IT manager at your organization wants to know the advantages of using 2-Step Verification for your organization. What should you say? **Select all that apply.**

1 / 1 point

- ☒ It'll greatly reduce the risk of unauthorized access if a user's password is compromised.

**Correct**

Correct!

- ☐ We wouldn't have to manage individual user IDs and passwords for each user.
- ☐ It would be a great opportunity to make sure everyone in the organization has a security key.
- ☒ It'll reinforce our domain's password security by requiring our users to enter an additional code.

**Correct**

Correct!

3. Where do you go to enable 2-Step Verification for your domain to ensure it's available for your users?

1 / 1 point

- ☐ Security > Password monitoring
- ☐ Users > [User's Name] > Security
- ☐ Reports > Security
- ☒ Security > Basic settings

**Correct**

Correct!

4. The IT manager at your organization hasn't had a chance to explore the Admin console yet but wants to know what individual security settings he can manage for a user. What are some examples you could give him? **Select all that apply.**

1 / 1 point

- ☒ Examine a user's password strength

✓ **Correct**  
Correct!

- ☒ Determine if the user has 2-Step Verification set up

✓ **Correct**  
Correct!

- ☐ Review a user's administrative access

- ☒ Temporarily disable the user's Login Challenge for 10 minutes

✓ **Correct**  
Correct!

5. What data can you view in the Account activity report for users? **Select all that apply.**

1 / 1 point

- ☒ User Account Status

✓ **Correct**  
Correct!

- ☒ Admin Status

✓ **Correct**  
Correct!

Correct!

☒ 2-Step Verification Enrollment

Correct

Correct!

☐ Managed devices

6. Your IT manager has just informed you that your organization has an account now with Asana and would like you to enable Single Sign On with the application. Where in the Admin console would you go to configure a third-party pre-integrated cloud application, like Asana, as your service provider?

1 / 1 point

- ☐ Apps > SAML apps > plus sign (+) > Select Setup My Own Custom App from the Enable SSO for SAML Application window
- ☐ Security > Set up single sign-on (SSO) > Check the Setup SSO with third party identity provider box and provide the necessary information
- ☒ Apps > SAML apps > plus sign (+) > Select Asana from the Enable SSO for SAML Application window
- ☐ Security > Basic Settings > Under Two-step verification, click on Go to advanced setting to enforce 2-step verification

Correct

Correct!

7. Where do you go to manage your users' password strength?

1 / 1 point

- ☐ Security > Password monitoring
- ☒ Security > Password management
- ☐ Users > [User's Name] > Account
- ☐ Reports > Security

Correct

Correct!

8. Your organization has decided to enforce 2-Step Verification in 2 weeks. What actions should you keep in mind when enforcing 2-Step Verification? **Select all that apply.**

1 / 1 point

You'll need to provide a lead time for users to enroll in 2-Step Verification before enforcement.

Correct

Correct!

You'll want to confirm that all of your users are enrolled in 2-Step Verification before enforcement.

Correct

Correct!

When you create new user accounts after enforcement, you will need to place these users into an exception group so they can access their account and enroll in 2-Step Verification.

Correct

Correct!

Enforcing 2-Step Verification will not affect your users whether they are enrolled in 2-Step Verification or not.

9. Where in the Admin console do you go to enable API access that allows access to various Admin SDK APIs?

1 / 1 point

Security > Advanced settings

- ☐ Security > Advanced settings
- ☐ Security > API Permissions
- ☐ Security > Basic settings
- ☒ Security > API reference

✓ **Correct**  
Correct!
