1. Which statements are true about App Engine? Choose all that are true (2 correct answers).

   ☑ It is possible for an App Engine application's daily billing to drop to zero.

   ✓ **Correct**
   Correct!

   ☑ App Engine manages the hardware and networking infrastructure required to run your code.

   ✓ **Correct**
   Correct!

   ☐ App Engine requires you to supply or code your own application load balancing and logging services.

   ☐ App Engine charges you based on the resources you pre-allocate rather than based on the resources you use.

   ☐ Developers who write for App Engine do not need to code their applications in any particular way to use the service.

2 / 2 points

2. Name 3 advantages of using the App Engine Flexible Environment over App Engine Standard. Choose all that are true (3 correct answers). **2 / 2 points**

☑ You can install third-party binaries

✓ **Correct**

Correct!

☐ Your application can execute code in background threads

☑ You can SSH in to your application

✓ **Correct**

Correct!

☐ Google provides automatic in-place security patches

☑ Your application can write to local disk

✓ **Correct**

Correct!

3. Name 3 advantages of using the App Engine Standard Environment over App Engine Flexible. Choose all that are true (3 correct answers). **2 / 2 points**

☑ Google provides and maintains runtime binaries

✓ **Correct**

Correct!

☑ Billing can drop to zero if your application is idle

Billing can drop to zero if your application is idle

> ✓ **Correct**
> Correct!

☐ You can choose any programming language

☑ Scaling is finer-grained

> ✓ **Correct**
> Correct!

☐ You can install third-party binaries

4. You want to do business analytics and billing on a customer-facing API. Which GCP service should you choose?   `1 / 1 point`

◉ Apigee Edge

◯ Cloud Endpoints

> ✓ **Correct**
> Correct!

5. You want to support developers who are building services in GCP through API logging and monitoring. Which GCP service should you choose?   `1 / 1 point`

◉ Cloud Endpoints

◯ Apigee Edge

> ✓ **Correct**
> Correct!

6. You want to gradually decompose a pre-existing monolithic application, not implemented in GCP, into microservices. Which GCP service should you choose?

- ⦿ Apigee Edge
- ○ Cloud Endpoints

✓ **Correct**
Correct!
