1. Which of the following statements is TRUE for the use of Cloud Identity? `1 / 1 point`

   ⦿ Cloud Identity can work with any domain name that is able to receive email.

   ◯ Your organization must use G Suite Services in order to use Cloud Identity.

   ◯ You cannot use both Cloud Identity and GSuite services to manage your users across your domain.

   ◯ A G Suite or Cloud Identity account can be associated with more than one Organization.

   > ✓ **Correct**
   > Correct! You do not have to use GSuite services to use the Cloud Identity Free edition.

2. The main purpose of Google Cloud Directory Sync is to: (choose ONE option below) `1 / 1 point`

   ⦿ Help simplify provisioning and de-provisioning user accounts.

   ◯ Enable two-way data synchronization between GCP and AD/LDAP accounts.

   ◯ Completely replace an Active Directory or LDAP service.

   > ✓ **Correct**
   > Correct! Managing user accounts manually can be tedious and time-consuming when an organization has many users.

3. Which TWO of the following are considered authentication "best practices?" `1 / 1 point`

   ☑ Avoid managing permissions on an individual user basis where possible.

   > ✓ **Correct**
   > Correct! Assigning users to groups and giving the group role-based permissions is much easier to manage.

   ☐ Organization Admins should never remove the default Organization-level permissions from users after account creation.

   ☐ Requiring 2-Step Verification (2SV) is only recommended for super-admin accounts.

   ☑ You should have no more than three Organization admins.

   > ✓ **Correct**
   > Correct! Too many admins can create additional risk as well - the general advice is no more than three admins per organization.
